

Rebecca Braaten will serve as Head of School for Trinity Lutheran School (K-12) in 2018-2019 school year. Mrs. Braaten holds a master's in educational technology and also holds a Director of Christian Education certification. She has transformed Trinity Lutheran School's use of educational technology, therefore making TLS the most technologically advanced classical Christian school in the valley!

Exciting Technology News!

Cutting Edge Computer Science & Raspberry Pi Coding at TLS!

Mrs. Rebecca Braaten attended the Raspberry Pi Foundation's Picademy in Seattle this summer to become a Raspberry Pi Certified Educator! There are only two Raspberry Pi Certified Educators in all of Montana. Mrs. Braaten is the only K-12 teacher in the Flathead Valley holding the Pi training credential!

Our 7th, 8th, and 9th grade Computer Science classes will be learning Python programming (the most widely used programming language today) and will be creating physical computing projects with Raspberry Pi.

We are eager to see how Trinity Lutheran School can continue to set the bar in offering the most advanced technology in Christian schools throughout Montana. This Pi credential opens many doors for TLS to offer additional community outreach opportunities throughout the state of Montana as a Pi Lab leader and innovator. Interested in learning more about Raspberry Pi? Contact Rebecca Braaten at 257-6716 or visit www.trinityed.org.
